BAD ST. BERNARDS.

If This Be True, School Readers Will Have to Be Revised.

All except the most depraved cynics will grieve to learn of the sad indictment of the St. Bernard dogs, which are supposed to be trained to rescue belated travelers in the Alps. These noble beasts, which everybody has been told possess fidelity more than human, have heavy excepted of has transhory by our been accused of base treachery by cer tain mountaineers. Thus one traveler

"I was approaching the summit of Piz Languard in company with a friend when a huge St. Bernard met us on a narrow path. With a very transparent assumption of good feeling toward m the brute ran at us and tipped us over the ledge. Providentially the next ledge was near, and we fell softly on the snow. Then the fiendish ingenuity of the brute became apparent. Instead of the brute became apparent. Instead of attempting our rescue, as the dogs in foolish old legends do, this great cur busied himself with the luncheon bas-ket, which had burst with the impact, and ate our cold chicken, while some deft alpenstock work, a length retrieved our safety. The soone these mountain pests are extinguishe the better."—New York Sun.

This makes a delightful trip during the hot wes ther. Fare \$1.00 for the round trip. jy7-tf

Children Cry for Pitcher's Castoria.

POOR OLD CRUSOE.

His Hut to Be Torn Down and a Prison Erocted There.

There has been received during the past 30 days news from Chile which will not be regarded as joyful intelligence by the fri nds of Daniel Do Foe. Poor old Robinson Crusoo's hut on Juan Fernandez island is to be torn down, and in its place will be erected a prison station, to be used as an auxiliary to the Chileau penitentiary at Santiago. Juan Fernandez is to be thrown open to settlers, and rumer is extant that Moche island will also be advortised as "a splendid place for a poor man to make a fortune." Mocho island is mentioned in connection with the story of Juan Fernandez, because, according to South American historians, the spot was probably the landing piace of Sailor Alex ander Selkirk, whose adventure De Foe olaborated into chapters of marvelons narrative, instead of the lonely rock sveraf-hundred miles in a southwesterly direction from the port of Valparaiso Doubt still exists in the minds of a number of Chilean writers as to the identity of the island on which Selkirk spent four years of lenely existence. The Chilean department of coloniza-

tion has never been inclined in time past to invite settlers to the islands ly ing off the coast of Chile and owned and controlled by that republic. Robin son Ornson's domain has been zealously guarded by representatives of the Chil ean government, and all attempts to sottle upon it or to learn the secrets of its queerly shaped conyons, ranges and peaks have been discountenanced by stolid officials of that little southern nation.—San Francisco Bulletin
